ABOUT ME

Skilled in WordPress and Multer, as well as HTML5, CSS, JavaScript, MongoDB, Express.js, Node.js, React, and Figma.Excels in creating dynamic web applications by utilizing a broad range of frameworks and development languages. Proficient in front-end and back-end technologies, as well as the creation of user-centric interfaces. "I am passionate about innovative web development and am looking for opportunities to drive impactful digital experiences."

EXPERIENCES

March 2023- Current
Google Developer Student Clubs

Event Head

- As GDSC Event Head, I organized many events, planned everything, and led a team. I made fun activities happen, worked with others, managed stuff, and created cool event ideas. My leadership made events smooth and fun for everyone involved.
- Established clear objectives and goals for each event, drove execution toward goals and measured and monitored results to track impact.

January 2023- Current
Avalon TechFest

Technical Head

- As Technical Head for Avalon, I organized fun tech events, led teams, and made cool shows. I planned, led, and worked with others to make tech stuff awesome. I helped create a fun tech space, made sure things ran well, connected people, and kept making it better.
- Maintained close communication with people throughout event life cycles for accurate progress reporting and prompt issue resolution.

PROJECTS
